

Civil Engineers have a critical role in protecting public health, safety and welfare.

SERVICES

The CEG team provides civil engineering design, planning and construction management on federal, public works, and private infrastructure projects.

EXPERIENCE THAT COUNTS

Experienced professional engineers, designers, surveyors and construction managers understand the process of a project from preliminary planning, to design, construction, and inspection. We deliver clear and comprehensive plans and reporting. Our deliverables are consistently on time and on budget.

TRUSTED ADVISOR

CEG engineers are valued and trusted team members with all of our clients. We integrate with your facility or community, making recommendations for the short-term success of a project, and the long-term benefits of the community. Projects large and small are given the attention required to improve the quality of life of the impacted population.

SUSTAINABLE AND RESILIENT

Our seasoned professionals know the value of integrating natural features into our planned infrastructure improvements. Our design respects the environment, and provides resiliency in function over form.

- Capital Improvements Planning and Design
- Road Program/ Pavement Assessment
- Stormwater Management Design
- Subdivision/Land Development
- Water/Wastewater Design
- Erosion & Sediment Control (E&S)
- Site Design & Grading
- Utility Design and Coordination
