

CEG's water and wastewater experts offer professional services to protect and improve public health treatment.

SERVICES

Water is the life of our communities. Without these vital services, public health would be affected. From regulatory reporting requirements to assisting with maintenance and capital improvements, we have the expertise and experience to help with your water and wastewater systems.

WATER

Water treatment plants and distribution systems are coming under more regulatory obligations, creating additional operations and capital costs. Whether it is preparing regulatory reports, grant funding, evaluating the water distribution system, preparing permit applications, or design of capital improvements, CEG provides services that can help municipalities and authorities meet drinking water requirements.

WASTEWATER

Wastewater treatment plants and collection systems are required to reduce discharge parameters due to more stringent regulations from Federal and State agencies. From reducing the inflow and infiltration of water into the sewer system, to reduction in discharge parameters, we help meet these needs. Effective and efficient operations of your wastewater treatment plant and collection system can help you uphold your budget.

- Feasibility and Concept Studies
- Water Allocation Permitting
- Plant Design
- Residential Water Meter Replacement
- Emergency Response Plan
- Drought Contingency Plan
- Water Conservation Plan
- Preparation of Water and Sewer Standards
- I&I investigation
- Act 537 Planning & Compliance
- PA H2O Grant Application
- PENNVEST Funding
- Corrective Action Plans
- Construction Observation
- Chapter 94 Reporting
- GIS Based System Mapping & Asset Management
- Wastewater Collection & Conveyance and Drinking Water Distribution
- Infrastructure Design
- Pump Station Design
- PFAS/PFOAS Mitigation Plan and Implementation
